FOR IMMEDIATE RELEASE

## **KELSO TECHNOLOGIES RELEASES 2<sup>ND</sup> QUARTER RESULTS SHOWING RECORD SALES REVENUE**

**WEDNESDAY APRIL 29, 2009 - VANCOUVER, BC, CANADA – Kelso Technologies Inc. (TSXV:KLS and Pink Sheets:KEOSF) today released its financial results for the second quarter of fiscal 2009. Kelso achieved a record quarter with gross revenues of \$158,494 for the three month period ended February 28, 2009, through sales of its Pressure Relief Valves and Inspection Valves to the rail tank car sector. The Financial documents may be viewed on Kelso's website at [www.kelsotech.com](http://www.kelsotech.com) or at [www.sedar.com](http://www.sedar.com).**

Kelso, after several years of product development and research, has over the past several months, landed new short and long term contracts which management believes can yield in excess of ten million dollars over the next few years and result in profitable operations providing a solid return on investment to shareholders. The Company believes that finally, its years of efforts in research and development and recent marketing of products can and will produce millions more in orders beyond what has occurred this quarter.

For years, Kelso has worked on producing quality products that are a remarkable cut above its competition in durability, service, low cost-of-ownership and safety for rail tank cars and eventually for tanker trucks moving over the highways and ISO tanks for storage and transport internationally. Kelso's products protect the public from releases and spills of hazardous and toxic materials.

In early 2009, the Association of American Railroads, along with the US Federal Railroad Administration and Transport Canada, announced a joint effort at further refining tank car transport safety. The products Kelso has developed through extensive research, testing and patenting over the past several years are gaining recognition as meeting and exceeding the new safety and reliability standards that are being mandated by governmental regulators and the industry in this effort.

*"Kelso is grateful to its many investors who have recognized the long development and marketing process this has had to take place. And, Kelso is now properly positioned and committed to increasing shareholder value in years to come, because our superior products are now being recognized for the quality and value we have always strived to achieve in order to grow our company. We hope to have more good news to report in the months and quarters ahead,"* stated John L. Carswell, President & CEO of Kelso Technologies Inc.

Kelso announces, further to its news release dated February 23, 2009, that it is increasing its private placement from \$160,000 to \$180,000 to reflect additional subscriptions received and expects to close the private placement very soon.

**Kelso's prestigious customer list includes, among others, such companies as American Railcar Industries, BASF Corporation, DuPont, Eastman Chemical, Exxon-Mobil, Millennium Rail Industries, Olin Chlor Alkali Products, Occidental Chemical Corporation, PotashCorp/GATX, Rescar Industries, Southwest Rail, Terra Nitrogen, Texana Tank Car, TrinityRail and Union Tank Car Company.**

**Kelso is a customer-driven, product-solutions company and developer of the unique JS line of pressure relief valves, the Manway Securement System (allowing access to the top of the tank car utilizing a one band fastening system resulting in reduced maintenance) and other unique rail tank car products for the rail industry.**

**Kelso Technologies Inc. is a public company that trades on the TSX Venture Exchange under the symbol KLS and is quoted in the United States on the Pink Sheets under the symbol KEOSF.
